Dialectic - Example

Another Form of Dialectic - Risk Mitigation

If you want to do something

- Look at everything that might go wrong and
- How you can overcome or reduce those risks
- Then, plan your way back to the status quo if everything did go wrong
- If you can get back to where you are now, your real risk is very low
- You should probably go for it

Find a wisdom jig to help you through this way of thinking here
