Free Thinking, Reality, and Logical Ditches

When we are orienting and deciding in our OODA loop, we are using all of our intuitive and deductive powers to think creatively and precisely.

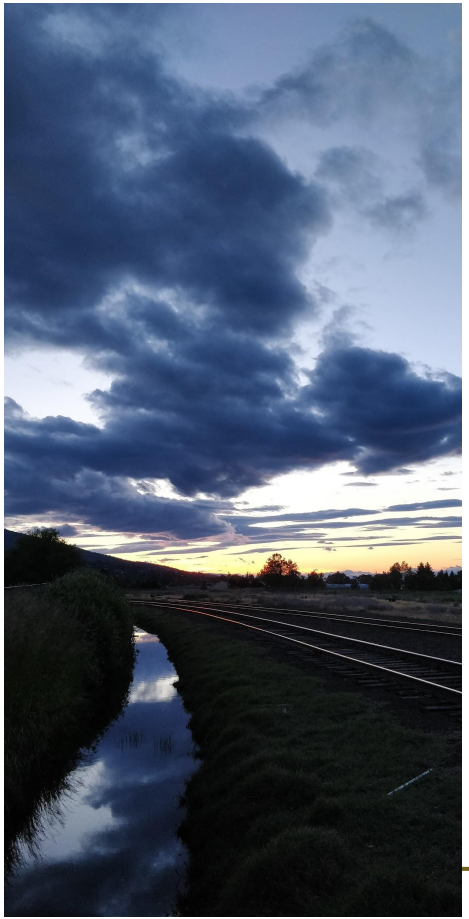

We are free to explore the world of ideas.

The important thing is to

avoid

known errors in thinking

Logical Fallacies

are

common thinking errors

humans have made across the ages

Aristotle (384 – 322 BC) was the first to list logical errors

A Few Common Logical Fallacies

- Ad Hominem - "Sleepy Joe" & "Crooked Hillary"
- False Dilemma - Capitalism v. Socialism in the US
- Slippery Slope Fallacy - Vietnam war
- Hasty Generalization - "Rapists & murders coming across the border"
- Causal Fallacy (Post hoc) - A person died after receiving a vaccine, so vaccines kill people
- Fallacy of Sunk Costs - Ongoing Iraq war
- Appeal to Authority - CIA and Colin Powell justification for Iraq war
- Bandwagon Fallacy - Asset bubbles like stocks and housing
