Assignments

Humane Leadership Institute

Assignments this week

- Complete a Performance Wisdom Jig on your work as a scientist in your self leadership lab. How good of a scientist are you being? This check-in can form the basis for your mid-term paper.
  - Complete a new Lab Notebook with your experiment for the week
- Draft your final deck
- Review your deliverable design with your instructor and then your client
- Write your Midterm letter - 5 pages due by the end of Sunday
  - Details on the next slide
- Read HL chapter 9 - Opportunities
-

Midterm Paper - Content

Write a letter to your instructor analyzing your work so far as a scientist in your own self leadership lab, as a project leader, and as a student of humane leadership.

You should use the Performance Wisdom Jig as the basis for your analysis and include as many of the insights you have gained from the lectures, readings, and the other wisdom jigs and tools we have used. This is your chance to show off all you have learned and synthesize your work into a compelling, personal letter exploring your learnings and open questions.

I am looking for depth of engagement, experience, and insight. Your letter should read like you are sharing your personal exploration and examples of what you have learned about your own self leadership so far using all the tools we've offered you.

Rewrite the dependency tree you created for your project in week 2. You have learned a lot in the past few weeks and your dependency tree will become more accurate based on your fresh critical thinking skills and deeper project domain expertise.

Midterm Paper - Details

- ~5 page letter to Stephen
- Maximum 12 pt font, 1” margins. Single spaced.
- Upload to your Google Drive homework folder as a Google Doc or PDF
  - By Midnight on Sunday of this week
  - Comment to +**katie@localinnovation.works** to let us know you have turned it in

Hint: A dependency tree is a great outlining tool. Start with my requests for what you should write about on the prior slide in the box at left.

Work to the right figuring out all the ways you can hit those notes in your paper. Your outline and main points/examples will emerge as you work. Just an idea. ;-)
